About Curayte.

Curayte began with a simple idea: every space deserves to feel like home.

As an interior designer, I've worked on new builds and remodels, but I noticed how many people felt stuck when it came to styling their apartments or first homes. They wanted warmth, personality, and polish, without the renovation or overwhelm.

Curayte home styling was created to make that possible, helping you craft spaces that reflect who you are and meet you where you are, no matter your square footage or budget.
